Data setup

Load file

```
dfSpacy<-read_excel('MovieData_Spacy.xlsx')
```

Change variable types and recode variables.

```
# Recode character gender for interpretation
dfSpacy$CharIsWoman <- ifelse(dfSpacy$Gender == "M", 0, 1)

# Convert variable to factor
dfSpacy$CharIsWoman<-as.factor(dfSpacy$CharIsWoman)

# Recode writer gender for interpretation
# Man = 0, Both = 1, Woman = 2
dfSpacy$WriterGender <- ifelse(dfSpacy$WriterGender == "M", 0,
                               ifelse(dfSpacy$WriterGender == "B", 1, 2))
dfSpacy$WriterGender= as.factor(dfSpacy$WriterGender) # Convert to factor

dfSpacy$MovieYear = as.numeric(dfSpacy$MovieYear) # Convert variable to numeric
```

Check and remove movies which have no text in either character gender category

```
# Replace intensifiers with NA for rows with no word count
dfSpacy$intensifiers <- ifelse(dfSpacy$NW == 0, NA, dfSpacy$intensifiers)

# Inspect NAs
sum(is.na(dfSpacy$intensifiers))
```

```
## [1] 132
```

```
# Check if NAs are related to Char Sex code
table(is.na(dfSpacy$intensifiers), dfSpacy$CharIsWoman)
```

```
##
##           0   1
##   FALSE 570 524
##   TRUE   43  89
```

```r
# Count movies with no Text for both Male and Female
movies_no_text <- dfSpacy %>%
  group_by(MovieID) %>%
  summarise(
    no_text_male = all(is.na(Text[CharIsWoman == 0])),
    no_text_female = all(is.na(Text[CharIsWoman == 1]))
  ) %>%
  filter(no_text_male & no_text_female)

# Number of movies with no Text data
print(paste("Number of movies with no Text data:", nrow(movies_no_text)))
```

```
## [1] "Number of movies with no Text data: 19"
```

```r
#Drop if movies have no text for either M or F
dfSpacy2 <- dfSpacy %>%
  filter(!MovieID %in% movies_no_text$MovieID)

# Final data
length(unique(dfSpacy2$MovieID))
```

```
## [1] 594
```

Descriptives

Movie Year
